#### Remarks on Advertising.

We are now entering into the season of the year when every business man should make his business known. The way to do this successfully is by advertising. The business men of Savannah should look to their interest in this respect, and represent themselves well in

It may be that our business men do not look at this in a proper manner, or they would surely do more in this line. They may not be aware that we are sending our papers far and wide; hundreds of persons peruse our columns weekly who prehaps never heard of Savannah before. We look at advertising in this manner: The newspaper is the guide of emigration, parties name of Ritchy went into the store of wishing to emigrate, examine all periodicals from which they may obtain any information in regard to times in different loealities, in doing so they must judge from display of advertisiments in such papers as they may chance to see; when they see they are at once impressed, with the feet ities in looking out a location than any other. And those who advertise are almost certain to obtain their patronage.

We wish to enlarge our paper and hope at the beginner of the next quarter to send out a handsomer paper than has ever before been published in Savannah. We hope Why do you walk to the Depot these all our business men will take hold and
